

## INDEX TO VOLUME XIII

### AUTHORS INDEX

#### A

ARNOLD, J. P. Traumatic occlusion, 24  
ASHPLANT, P. R. Auxiliary springs, their construction and application on practical cases as used with lingual and labial appliances, (Clinic), 1048

#### B

BABCOCK, J. K. The teaching of orthodontics, 670  
BACH, ERNEST N. Cast Hawley retainer with attachments showing advantages over the vulcanite retainer, (Clinic), 987  
BAKER, CHARLES R. Technic of taking an impression of a molar tooth for which an orthodontic band is to be made, (Clinic), 1051  
BLUM, THEODOR. Additional notes on the simple plastic operation for the restoration of the alveolus (and its usefulness in other conditions), 1061  
BRANDHORST, O. W. A comparative study, 264  
BROWN, G. C. Buccal and labial extensions from the lingual arch, (Clinic), 885  
BRUHN, CHRISTIAN. The surgical-orthopedical removal of the deformation of the jaws, 65  
BUSBY, O. E. President's address before the Southwestern Society of Orthodontists, 22

#### C

CAINE, WINSTON P. Appliance used in treatment of case of extreme mesioocclusion, (Clinic), 1050  
CAMPION, GEORGE G. Facial measurements in diagnosis, 739  
CARREA, JUAN UBALDO. Deciduous and permanent supernumerary teeth, six maxillary incisors, (Case Report), 1055  
—. Impacted maxillary left canine in a patient of eighty-two years of age, (Case Report), 1054

CASTO, F. M. Past, present, and future of orthodontics, 852  
CHAPIN, WALTER COOLIDGE. Congenital harelip and cleft palate—Case I, 539  
—. Congenital harelip and cleft palate—Case II, 543  
CHAPMAN, HAROLD. Orthodontics; the necessity of histories to establish etiology; the necessity of extra function in retention; the necessity of preserving spaces caused by premature loss of deciduous teeth, 768  
—. The age for orthodontic treatment, 144  
CHAPMAN, W. T. Report of case with congenitally missing mandibular right central with molar erupting right canine, 886  
CHIVARO, ANGELO. Relation between orthodontology and dental prophylaxis and hygiene, 260  
COEBERGH. The use of diagnostic aids in orthodontologic treatment by the general practitioner, 674  
COHN, SAMUEL ADAMS. Malnutrition in children, 465  
CONNOLLY, C. J. Relation of the orbital plane to position of teeth, 645

#### D

D'ALISE, CORRADO. The etiology and pathogenesis of Angle's Class II malocclusion, 680  
DEIBER, HARRY, AND WRIGHT, LOWELL B. Cases showing progressive correction of a habit without the aid of appliances and progress of a mutilated case. Treatment begun at the age of twenty-eight, (Clinic), 984  
DERIVAUX, R. C. Orthodontia in its relationships to growth and repair, 13  
DE VRIES, BERNARD G. A group of the more commonly used appliances of lingual and labial types, constructed in detail and mounted on porcelain dentures, (Clinic), 881  
DUNN, HOWARD. Brief digest of recent literature pertaining to orthodontia, 28

## E

EBY, JOSEPH D. President's address before the American Society of Orthodontists, 831

ELIAS, LEWIS W. Relation of pediatrics to orthodontics, 1045

ERNST, MAX E. Results obtained in treatment of mesioclusion cases, 725

EVANS, H. R. The choice of orthodontic apparatus in the more common forms of malocclusion, 755

## F

FERNALD, ADELBERT. Case report, 814

FERRIS, HENRY C. Original photographic studies of orthodontic cases, 627

FISHER, WM. C. Report of the president of the First International Orthodontic Congress, 454

FISK, G. VERNON. Different types of auxiliary springs used with pin appliances, 878

FOURAKER, L. F. The preservation of the deciduous dentition, 751

FRIEL, SHELDON. Occlusion. Observations on its development from infancy to old age, 322

## G

GEORGE, VIOLET H. Some details of interest in a collection of medieval skulls, 766

GRAY, B. FRANK. Are there certain cases of malocclusion in which orthodontic treatment is contraindicated? 1013

GRIEVE, GEORGE W. Buccal inclined planes, in conjunction with the pin appliance, for stimulation of growth of the mandible, (Clinic), 883

GRiffin, EDWARD M. The application of light resilient arches in conjunction with a special lock, (Clinic), 972

## H

HARRISON, FRANK H. Relieving impacted premolars, 714

HELLMAN, MILO. Changes in the human face brought about by development, 475

—. The face and occlusion of the teeth in man, 921

HILLIS, WILLIAM A. A Class II case showing photographs and models before and after treatment, 807

HITCHCOCK, HAROLD. Bone regeneration, 41

HOGGAN, J. A. CAMERON. The carrying of artificial teeth attached to an orthodontic appliance while moving teeth, (Clinic), 989

HOLDER, HARRY A. President's address before the Southern Society of Orthodontists, 1043

HOWE, HORACE L. (1) After-results of cases treated about twenty-five years ago. (2) After-result of case treated seventeen years ago, 536

HOWE, PERCY R. The influence of food on malocclusion, 199

HUGHES, W. G. Series of photographs of dissected skulls showing development and eruption of teeth, and models of natural teeth, 633

HUMPHREY, WM. R. (See Ketcham and Humphrey), 994

HYATT, THADDEUS. How can orthodontics help preventive dentistry? 961

## I

IRISH, R. E. Conscious constructive application of pressure, 528

IZARD, G. New method for the determination of the normal arch by the function of the face, 582

—. The gonomandibular angle in dentofacial orthopedia, 578

## J

JAMES, L. M. Report of case complicated by an impacted maxillary canine and early mutilation, 706

## K

KADNER, ALBERT. The necessity of an individual therapy instead of schematizing methods, 651

KANTOROWICZ. The self-correction of orthodontic anomalies, 128

KAPLAN, DAVID M. Endocrinodontia, 49, 58, 176, 269, 344, 434

KETCHAM, ALBERT H. A preliminary report of an investigation of apical root resorption of permanent teeth, 97

— AND HUMPHREY, WM. R. Orthodontic treatment following operation for unilateral ankylosis of the temporomaxillary articulation, (Case Report), 994

## L

LAY, VICTOR. A new form of lingual lock-wire, 1047

LINDSAY. A note on percussion as a stimulus to the growth of bone, 763

LISCHER, B. E. Clinical photography for orthodontists, 1

LOCKETT, A. C. A comparative study of three American textbooks on orthodontia by Angle, Dewey and McCoy, with special reference to finality in orthodontics, 776

LUNDSTRÖM, AXEL L. Some case reports and their bearing on diagnosis, 213

## M

MACMILLAN, HUGH W. A consideration of the pressure produced by the mandibular third molar, 291

MCCARTER, WILLIAM A. Underdeveloped maxilla and overdeveloped mandible, (Case Report), 625

McCoy, JAMES DAVID. Essential technic in the use of the open tube appliance, 252

MARSH, H. E. Two cases of excessive overbite treated with lace-wire inclined plane, 615

MATSUDA, YOSHIMI. Location of the dental foramina in human skulls from statistical observations, 299

MATTHEWS, G. F. CALE. British Society for the Study of Orthodontics, 520

—. Excessive width of maxilla, an unusual case of distoclusion with impaction of second premolars, 990

—. Lock, 410

—. The complete deciduous dentition at the eruption of the first permanent molars; its importance in diagnosis and classification, 306

MEAD, STERLING V. Acute osteomyelitis of the mandible, 1065

—. Benign giant-celled tumor, 817

—. Fracture of the coronoid process, 727

—. Selection of anesthesia for dental surgery, 903

METZ, H. C. Recording actual pressure exerted by auxiliary springs in conjunction with lingual arch, 723

MILLARD, JOSEPH J. Orthodontia and its uses in the preliminary treatment of extreme cases of hare-lip and cleft palate, 621

MORSE, ARTHUR L. A consideration of continuous treatment, 845

MUIR, NORBORNE F. Several overbite cases treated with the lingual and plain labial arches, 719

## N

NEUSTADT, EGON. The growth of bone as related to function, 555

## P

PHILLIPS, GEORGE P. Probable primary factors controlling occlusion. Radiographic findings, 379

POND, SAMUEL E. Recent contributions to our knowledge of bone and tooth calcification, 565

PORTER, LOWRIE J. Orthodontic plaster model former, 443

PRITCHARD, G. B. Some notes on infections of the gingivae associated with malocclusion, 596

PULLEN, HERBERT A. Abnormal habits in their relation to malocclusion and facial deformity, 233

—. Treatment of the deep underbite with the inclined plane, 716

## Q

QUINTERO, JAMES T. Some uses of auxiliary springs in conjunction with labial arches, 602

—. The technic of soldering auxiliary springs to lingual arches, 663

## R

RICHARDSON, ELIZABETH E. A simple treatment for labioversion of the anterior teeth and open-bite cases, (Clinic), 1052

RIXFORD, EMMET. On the temporomandibular articulation, 399

ROGERS, ALFRED PAUL. Open-bite cases involving tongue habits, 837

—. Report of conference on orthodontic treatment employing the use of muscle exercises, 789

—. Treatment and retention of mesioclusion simplified, (Case Report), 1058

ROHDE, A. C. The possibilities of gnathostatics in differential diagnosis, 945

RUBBRECHT, O. Impressions of the First International Orthodontic Congress, New York, August, 1926, 353

—. Orthodontic principles in maxillofacial restoration, 411

## S

SCHWARZ, RUDOLF. Specimen case, 1059

SONTHEIMER, A. F. Tie-Douloureux, 689

SPAHN, CHARLES A. Third molars response to spring pressure, (Case Report), 892

STANTON, FREDERICK LESTER. Class I (neutroclusion) impacted maxillary canine with forward drift of maxillary right molars and premolars, simulating a Class II subdivision case. (1) Maps of the malocclusion. (2) Axis of symmetry and centroid of denture. (3) Maps of proposed occlusion. (4) Composite maps of maxillary and mandibular showing the malocclusions related to the occlusion to show the minimum tooth movement change from malocclusion to occlusion. (5) Photographs of models at various stages. (6) Drawings of the appliances, 790

STEVENS, J. B. (*See* Van Gieson and Stevens), 808

SUBIRANA, LUIS. At what age should regulations be undertaken? 207

—. The Subirana theradontograph, 979

T

TAYLOR, J. E. A review and criticism of an article entitled, "An appraisal of present-day orthodontic procedure, 517

THOMPSON, A. B. Two cases showing the development that is taking place with the use of lingual arch and auxiliary springs, 895

V

VAN GIESON, R. B., AND STEVENS, J. B. Three cases—neutroclusion, distoelusion, and mesioelusion, 808

W

WEBSTER, RAYMOND L. Two cases of hereditary supernumeraries in same family (Case Report), 620

WHITE, OLIVER WILSON. Case Reports, 888

WINSTON, LOUIS S. Alteration of apparatus during treatment, 805

WOODBURY, WILLIAM W. Some questions. Are we really trying to answer them? 868

WRIGHT, LOWELL B. (*See* Deiber and Wright), 984

Y

YOUNG, J. LOWE. Radiographic exhibit, 1069

Z

ZEMSKY, JAMES L. Bleeders, bleeding and means to control it, 998

—. Hemorrhages in oral surgical operations, 897

## GENERAL INDEX

### A

Abstracts, 81, 184, 275, 456, 547, 730, 820, 911, 1003, 1082  
Actinomycosis of the mouth and neck, 184  
Age, at what, should regulations be undertaken? 207  
for orthodontic treatment, 144  
Alveolar gum pads at birth, 323  
infection, residual, after tooth extraction, 82  
pyorrhea, 820  
Alveolus, simple plastic operations for the restoration of the, 1061  
Amalgam, toxicity of, 186  
American Association of Dental Schools, 829, 922, 978, 1053  
Dental Golf Association, 92  
Society of Oral Surgeons and Endodontists, 376  
Society of Orthodontists, 282, 359, 361, 459, 462, 737, 829, 921, 1011, 1092  
president's address before, 831  
resolution adopted by the, 705  
round table discussion, 83, 192, 282, 307  
Women dentists, Federation of, 737, 829  
Anesthesia for dental surgery, selection of, 903  
general, lectures on, 278  
Angle's Class II malocclusion, etiology and pathogenesis of, 680  
Ankylosis, unilateral, of the temporomaxillary articulation, orthodontic treatment following operation for, 994  
Apical root resorption of permanent teeth, 97  
Apparatus during treatment, alteration of, 805  
Appliance joker, 1009  
open tube, essential technic in use of, 252  
used in treatment of case of extreme malocclusion, 1050  
Appliances, lingual and labial, auxiliary springs, their construction and application on practical cases as used with, 1048  
of lingual and labial types, a group of the more commonly used, 881  
Arch, normal, new method for the determination of, by the function of the face, 582  
Arches, light resilient, application of, in conjunction with a special lock, 972  
Articulation, temporomandibular, 399  
Articulator, Phillips, 392  
Auxiliary springs, construction of, 606  
different types of, used with pin appliance, 878  
recording actual pressure exerted by, in conjunction with lingual arch, 723

### Auxiliary springs—Cont'd

some uses of, in connection with labial arches, 602  
technic of soldering to lingual arches, 663  
their construction, and application of practical cases as used with lingual and labial appliances, 1048

### B

Bacterial infection with special reference to dental practice, 279  
Benign giant-celled tumor, 817  
Bleeders, bleeding and means to control it, 998  
Bleeding and coagulation time, simple tests for, 897  
Blood, disease of the, 899  
Bone, alterations in, 575  
and tooth calcifications, recent contributions to our knowledge of, 565  
crystalline condition in, 574  
development of, 384  
growth of, as related to function, 555  
percussion as a stimulus to the, 763  
necrosis of, 820  
regeneration of, 41  
British Society for the Study of Orthodontics, 463, 520  
Buccal and labial extensions from the lingual arch, 885  
inclined planes, in conjunction with the pin appliance, for stimulation of growth of the mandible, 883

### C

Calcification, bone and tooth, 565  
initiation of, 568  
Calculus of Wharton's duct, 821  
Canadian Dental Association, 287  
Canine, maxillary, impacted, and early mutilation, case complicated by, 706  
Caries, dental, and tooth conservation, 457  
etiology of, 184  
new research on, 84  
problem of, 185  
Case reports, 539, 543, 620, 621, 625, 706, 714, 808, 814, 886, 888, 892, 895, 990, 994, 1054, 1055, 1058, 1059  
treated seventeen years ago, after-result of, 536  
twenty-five years ago, after-results of, 536  
Chicago Dental Society, 971, 1044  
Children, general disease in, oral signs of, 731  
malnutrition in, 465  
Class I (neutroclusion) impacted maxillary canine with forward drift of the maxillary right molars and premolars simulating a Class II subdivision case, 790

Class II, 638  
 case showing photographs and models before and after treatment, 807  
 cases, treatment of, 760  
 Class III, mutilated cases of, 814  
 Cleft palate, congenital harelip and, 539, 543  
 surgery and the dental profession, 1082  
 Clinie, 264, 410, 443, 528, 536, 627, 633, 716, 719, 723, 725, 790, 805, 807, 878, 881, 883, 885, 972, 979, 984, 987, 989, 1048, 1050, 1051, 1052  
 Clinical photography as a diagnostic aid, 11  
 for orthodontists, 1  
 Clinician of the future, 187  
 Congenital harelip and cleft palate, 539, 543  
 Convulsive tic, 820  
 Coronoid process, fracture of the, 727

D

Deciduous dentition, complete, at eruption of first permanent molars, 306  
 preservation of the, 751  
 teeth, occlusion of, after their complete eruption, 324  
 premature loss of, necessity of preserving spaces caused by, 774  
 Dental anomalies, systematic diagnosis of, fundamental principles of a, (book review), 1084  
 aspects of malignant disease, 1003  
 caries and tooth conservation, 457  
 etiology of, 184  
 new research on, 84  
 foramina in human skulls, location of the, from statistical observations, 299  
 operations, general septicemia following, 276  
 patients with fever, 732  
 profession, cleft palate surgery and the, 1082  
 prophylaxis and hygiene and orthodontology, relation between, 260  
 surgery, selection of anesthesia for, 903  
 Dentine, hypersensitive, treatment of, with a sodium bicarbonate glycerin solution, 912  
 Dentistry, malignancy and its relation to, 1003  
 nonspecific stimulating treatment in, 730  
 practice of, and the Volstead act, 913  
 keeping fit for the, 911  
 preventive, how can orthodontics help it, 961  
 in England, 550  
 periodontia and, 549  
 Dentition, deciduous, preservation of the, 751  
 Dentitions, 941  
 Dentofacial orthopedia, goniomandibular angle in, 578  
 Denture, axis of symmetry and centroid of, 790  
 Development, changes in the human face brought about by, 475  
 of bone, 384  
 of distoclusion, 140  
 of muscles, 384  
 of teeth and dental arches, 383  
 of unilateral distoclusion, 141

Diagnosis, differential, gnathostatics in, 945  
 facial measurements in, 739  
 of dental anomalies, fundamental principles of a systematic, (book review), 1084  
 some case reports and their bearing on, 213  
 Directory of orthodontic societies, 197, 289, 377  
 Distoclusion, case of, 808  
 development of, 140  
 unilateral, development of, 141  
 with impaction of second premolars, an unusual case of, 990  
 Doctor N. S. Hoff, death of, resolution regarding, 737

E

Early treatment, reasons for, 147  
 Endocrinodontia, 47, 58, 176, 269, 344, 434  
 Etiology and pathogenesis of Angle's Class II malocclusion, 680  
 of dental caries, 184  
 of root canal infections, 914  
 European Orthodontological Society, 287, 376  
 Exodontia, a manual of, (book review), 510

F

Face and occlusion of the teeth in man, 921  
 growth of the, 921  
 Facial deformity and malocclusion, abnormal habits in their relation to, 233  
 measurements in diagnosis, 739  
 First District Dental Society, 737, 829, 922, 1011  
 International Orthodontic Congress, impressions of, 353  
 report of the president of, 454  
 transactions of, (book review), 1090  
 Focal infection in Berlin, the doctrine of, 275  
 theory, criticism of the, 1082  
 Food, influence of, on malocclusion, 199  
 Forum, 642, 735, 827, 919, 1009  
 Fracture of the coronoid process, 727  
 Fractured jaws, apparatus in the treatment of, 411  
 Fuso-spirilliosis, prevalence of, 83

G

Gingivae, infections of the, association with malocclusion, 596  
 Glossitis, Möller's, treatment of, 81  
 Gnathostatics, the possibilities of, in differential diagnosis, 945  
 Goniomandibular angle in dentofacial orthopedia, 578  
 Great Lakes Association of Orthodontists, 93  
 Grippe and tooth troubles, 731  
 Growth and repair, orthodontia in its relationships to, 13  
 of bone as related to function, 555

H

Habit, cases of, showing progressive correction without the aid of appliances, 984  
 Habits, bad pillowing, 245  
 finger sucking, 239  
 Finger sucking, 239

Habits—Cont'd  
 lip-biting, 244  
 mouth-breathing, 241  
 sucking or biting tongue, 244  
 psychotherapeutic treatment of, 246  
 use of pacifier, 239  
 thumb-sucking, 237  
 Harelip and cleft palate, extreme cases of, orthodontia and its uses in the preliminary treatment of, 621  
 congenital, and cleft palate, 539 543  
 Hawley cast retainer with attachments, showing advantages over the vulcanite retainer, 987  
 Hemorrhages in oral surgical operations, 897  
 Heredity, 382  
 Human face, changes in, brought about by development, 475  
 Hygiene, good, 472  
 Hyperpituitarism, 59  
 Hypothyroidal tropisms, 179

## I

Impacted maxillary canine, case complicated by an, and early mutilation, 706  
 premolars, relieving, 714  
 Incisors, six maxillary, case of, 1055  
 Inclined plane, treatment of the deep underbite with the, 716  
 Infected teeth and group medicine, 185  
 Infection, 473  
 bacterial, with special reference to dental practice, 279  
 focal, doctrine of, in Berlin, 275  
 of the gingivae associated with maloclusion, 596  
 residual alveolar, after tooth extraction, 82  
 Infraorbital foramen, location of the, 302  
 In Memoriam—Dr. C. W. B. Wheeler, 280  
 Iodoform tamponade, 820  
 Iowa State Dental Society, 376

## J

Jaws and teeth, injury to, from roentgen rays, 82  
 fractured, apparatus in the treatment of, 411  
 surgical-orthopedical removal of deformations of, 65

## L

Labial arches, some uses of auxiliary springs in conjunction with, 602  
 Labioversion of the anterior teeth and open-bite cases, simple treatment for, 1052  
 Lingual and plain labial arches, overbite cases treated with the, 719  
 arch and auxiliary springs, two cases showing the development that is taking place with the use of, 895  
 buccal and labial extensions from the, 885  
 technic of soldering auxiliary springs to, 663  
 lock-wire, a new form of, 1047  
 Lip-biting case, typical position in, 244  
 Lock, 410  
 Lock-wire, lingual, a new form of, 1047

## M

Malignancy and its relation to dentistry, 1003  
 Malignant disease, dental aspects of, 1003  
 Malnutrition, causes of, 467  
 in children, 465  
 symptoms of, 467  
 Maloclusion, abnormal habits as cause of, 235  
 and facial deformity, abnormal habits in their relation to, 233  
 Angle's Class II, etiology and pathogenesis of, 680  
 choice of orthodontic apparatus in the more common forms of, 755  
 extreme, caused by use of pacifier, 239  
 infections of the gingivae associated with, 596  
 influence of food on, 199  
 in which orthodontic treatment is contraindicated, are there certain cases of, 1013  
 maps of the, 790  
 open-bite, caused by sucking fingers, 239  
 Malpractice suits and professional insurance, 1005  
 Mandible, acute osteomyelitis of the, 1065  
 overdeveloped, and underdeveloped maxilla, 625  
 stimulation of growth of the, buccal inclined planes in conjunction with the pin appliance for, 883  
 Mandibular foramen, location of the, 301  
 right central, congenitally missing, with molar erupting right canine, report of case of, 886  
 third molar, pressure produced by the, 291  
 Marion-Sims Dental College, graduates homecoming, 376  
 Mastication, unilateral, as a cause of traumatic occlusion, 549  
 Maxilla, excessive width of, 990  
 underdeveloped, and overdeveloped mandible, 625  
 Maxillary canine, an impacted, and early mutilation, case complicated by, 706  
 incisors, six, case of, 1055  
 left canine, impacted, in a patient of eighty-two years of age, 1054  
 Maxillofacial restoration, orthodontic principles in, 411  
 Mental foramen, location of the, 299  
 Mesioclusion, case of, 808  
 cases, results obtained in treatment of, 725  
 extreme, appliance used in treatment of, 1050  
 simplified, treatment and retention of, 1058  
 Missouri State Dental Association, 94  
 Molar, mandibular third, pressure produced by the, 291  
 tooth for which an orthodontic band is to be made, technic for taking an impression of, 1051  
 Molars, third, response to spring pressure, 892  
 Möller's glossitis, treatment of, 81

Montana State Board of Dental Examiners, 921, 978, 1053  
 Mouth and neck, actinomycosis of, 184  
 conditions during pregnancy, factors influencing, 547  
 Mouth-breather, severe, typical face of, 241  
 Mouth-breathing cases, kinesitherapeutic treatment of abnormal musculature of face and neck in, 243  
 posture exercises for general bodily development in, 243  
 Muscle exercises, orthodontic treatment employing the use of, 789  
 Muscles, development of, 384

## N

Necrosis of bone, 820  
 Nephritis, 820  
 Neutroclusion, case of, 808  
 New York Society of Orthodontists, 921, 960  
 Notes of interest, 738, 829, 922, 1012

## O

Occlusion, balanced, 388  
 factors controlling, radiographic findings, 379  
 its development from infancy to old age, 322  
 maps of proposed, 790  
 of deciduous teeth after their complete eruption, 324  
 of permanent teeth of a young adult, 333  
 probably primary factors controlling, 376  
 stages of, 322  
 the problem of, 928  
 traumatic, 24  
 detection and correction of, 25  
 unilateral mastication as a cause of, 549  
 Odontotomy, prophylactic, 1004  
 Ontario Dental Association, 287  
 Open-bite cases involving tongue habits, 837  
 labioversion of the anterior teeth and, simple treatment for, 1052  
 maloclusion caused by sucking fingers, 239  
 Open tube appliance, essential technic in use of, 252  
 Oral sepsis, relation of, to disturbances of the general health, 457
